EDUCATION

Ajeenkya DY Patil University

B.Tech in Information Technology (Specialization in Data Science)

Pune

June 2022 – May 2026

EXPERIENCE

Software Engineer Intern

ThynkTech India

Feb. 2026 – Apr. 2026

Pune

- Deployed 3+ product features from API design through production, working directly with CI/CD pipelines to keep releases stable and reduce manual intervention.
- Developed and integrated RESTful APIs to support business-critical workflows and data-driven functionality
- Developed full-stack features using the MERN stack and containerized application services with Docker for consistent deployment environments.

Software Developer Intern

InstaPrepsAI

Aug. 2025 – Nov. 2025

Mumbai

- Owned backend reliability for the primary platform, resolving production issues that reduced downtime incidents
- Contributed to frontend and backend development, improving response performance and delivering responsive UI components for core platform features.
- Containerized services with Docker and orchestrated deployments via Kubernetes, cutting environment setup time and improving scalability under load

PROJECTS

NexTrade - Stock Trading Dashboard

- Built a stock market dashboard using React.js and REST APIs for price data and portfolio tracking
- Implemented JWT authentication for secure login and role-based access control for 3 user roles
- Cut dashboard load time by 30% by optimizing candlestick chart rendering and lazy-loading data views

SynapseAI - AI Web Based Application

- Architected a full-stack MERN chat platform supporting real-time AI conversation with session-based authentication.
- Reduced chat response latency by 20% by restructuring the message-handling pipeline and API payloads.
- Containerized the application with Docker and integrated CI/CD pipelines to automate build and deployment workflows.

StaySphere - MERN Based Accommodation Platform

- Developed a full-stack accommodation booking platform with property listing, search and reservation management
- Implemented secure user authentication with Express-Session and role-based access control for 3 user types
- Set up environment variables, ports, and runtime dependencies consistently across dev and production, which cut setup time by 35%.
- Optimized API response handling and structured prompt engineering improving system accuracy by 25%

TECHNICAL SKILLS

Networking: TCP/IP, DNS, DHCP, HTTP/HTTPS, Linux

Cloud & DevOps: AWS Fundamentals, Docker, Kubernetes, CI/CD, GitHub

Languages & Scripting: Python, Bash, JavaScript, TypeScript, SQL

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Redux Toolkit, FastAPI

Databases: MongoDB, MySQL

CERTIFICATIONS

IBM Cloud Computing Fundamentals

IBM

2026

Full Stack Development (MERN)

Apna College
