PROFESSIONAL SUMMARY

Software Engineer with hands-on experience in developing scalable full-stack web applications using MongoDB, Express.js, React.js, Node.js, and Python. Proficient in backend development, REST APIs, database management, and building responsive user interfaces. Familiar with DevOps tools and practices including Docker, Kubernetes, Git, and CI/CD pipelines. Strong understanding of software development, problem-solving, data structures, and modern programming concepts with a passion for building efficient and user-focused applications.

EDUCATION

Bachelor of Technology in Information Technology (Specialization in Data Science)

June 2022 – Present

Ajeenkya DY Patil University

SKILLS

Languages: JavaScript, Python, HTML, CSS

Frontend: React.js, Redux Toolkit

Backend: Node.js, Express.js, REST APIs

Database: MongoDB, MySQL

DevOps : Docker, Kubernetes, CI/CD, Git, GitHub, Postman

QA & Testing: Jest, API Testing, Test Case Design

EXPERIENCE

Software Developer Intern | InstaPrepsAI

Aug 2025 – Nov 2025

- Developed responsive React UI components using HTML, CSS, and JavaScript, improving usability by 30% across mobile and desktop screens.
- Containerized application services using Docker and managed deployments with Kubernetes for scalable infrastructure.
- Integrated REST APIs for real-time data fetch and updates, improving application performance and user experience.
- Collaborated with team members using Git/GitHub for version control and effective communication.

PROJECTS

NexTrade - Stock Trading Dashboard (MERN)

- Built a stock market dashboard using React.js and REST APIs to display price data, portfolio tracking, and market trends.
- Developed RESTful APIs using Node.js and Express.js for secure trade data handling and user portfolio management.
- Implemented JWT authentication for secure login, protected routes, and role-based access control.
- Designed responsive data visualization components to display candlestick graphs and market indicators.

SynapseAI - Conversational AI Web Application

- Integrated AI-driven conversational logic using API-based architecture and prompt-based interaction handling.
- Developed secure authentication and authorization using Express-session, enabling protected routes and role-based access.
- Used Docker to containerize the application and create a consistent development and runtime environment.
- Worked with structured prompts and response handling to improve interaction accuracy.
